Commentary and monthly news

Horizon Fund marked a 0.26% up in December, and marking a NAV of JD 116.532. The Fund managed to exploit the high yield treasuries that were issued between 2011-2012 period. The fund will continue to enjoy those yields throughout the term of these issues. However, with the gradual reduction on the treasury yields over the last few months, the fund is contemplating a tilt in its strategy by getting an allocation to equity while trying to keep the volatility in check as much as possible.

The fund manager will keep monitoring yields and leading indicative factors of its direction, such as but not limited to; the political turmoil influence, Foreign aid, trade deficit, CB monetary policy, meanwhile, the fund deployed some of the cash in the USD denominated Jordanian debt, it could add more in the same issuance, or could also benefit from investing in high cash dividend paying stocks when the opportunity arises and the valuation looks healthy to enhance the return.

On another hand, as a fund domiciled in Jordan, the fund is subject to any changes in tax regulations, and this could have a direct impact on the NAV.
